Front-End Web Developer: Brand Statement

I am a multi-lingual Full-Stack Web Developer, with an extensive musical background as a composer, theorist, copyist, and educator. I earned a Doctorate in Composition from the University of Toronto, a Conversational Language Certificate in French from the School of Continuing Studies, and I completed a Coding Bootcamp through the latter institution. I have acquired newly developed skills in HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, JSON, APIs, Node, Git, Express, ES6+, SQL Handlebars, Mongo, NoSQL, PWAs, React, JSX, and MERN-stack, and I enjoy exploring more effective ways to refine my code. My aim is to combine my passion for front-end design and coding by developing professional looking websites. As a hard-working, organised, and detail-oriented high achiever, I have obtained several scholarships and awards for my compositions, teaching, research, and academic performance. Due to the multitude of compositional and research collaborations in which I have taken part, I am able to work well and diligently both individually and as part of a team, and I am an excellent writer and communicator.

Skills Summary

- **Languages & Technologies:** HTML, CSS, JavaScript, jQuery, Bootstrap, Node, Express, Git, Ajax, JSON, API, ES6+, SQL, JSX, React, MERN.
- **Database:** MySQL, MongoDB
